Good morning,

I usually am available anytime but this Friday from 10-12:00 I have an appt for my son. Please send a new invite. I apologize for the inconvenience, and please include Sarah in the invite as well.

Thanks so much.

Hey Weston,

I am available whenever is suitable for you. I can do Friday or next week. Let me know and send the invite and I will be there.

I am EST, but really, anytime is good for me. I see you are in Overland Park, KS (-1 hour) which I am familiar with as I was stationed at Fort Riley for 7 years.

Look forward to our conversation, talk soon!

Very respectfully,

Jacob Bevier

Jacob,

Thanks for reaching out and sharing that information. We'd love to talk with you and see how we could help. Do you have anytime early next week? We could also do Friday in the AM. We can set up a Teams meeting.

Let me know!

Weston Schaper

My name is Jacob Bevier — I am a retired/disabled veteran, currently a cybersecurity analyst at the U.S. Department of Transportation, and co-founder of Brag & Bev LLC.

We have developed an initial aerosol prototype that performs well as a deodorizer—achieving full coverage, minimal pooling, and strong vertical reach. The challenge now is evolving this into a true cleanser, not just a deodorizer, while remaining VOC-compliant.

This is where we need ARE Labs' expertise. We are seeking a partner who can provide:

Aerosol testing to evaluate droplet size distribution, coverage uniformity, pooling, and reach.

Guidance on actuator, nozzle, and can pairing to maintain consistency.

Input on regulatory compliance as the formulation shifts from a deodorizer baseline to a functional cleanser.

We have funding in place and believe this is a strong opportunity to apply your testing and aerosol engineering expertise to help us cross that threshold into a compliant cleanser product.

Would your team be open to a conversation about how ARE Labs might support this effort? I can provide a concise presentation of our prototype results and constraints.
