

Our Big Idea

- Eco-friendly, self-righting, single-use cleaner for residential bins.
- High-expansion foam eliminates grime, grease, and odors effortlessly.
- Affordable and simple to use for homeowners.

The Residential Cleaning Challenge

- 125 million residential trash bins in the U.S. remain dirty.
- Leads to odors, bacteria buildup, and unsanitary conditions.
- Manual cleaning is inconvenient; professional services are costly.

How it Works

1. Self-Righting Technology: Ensures upright activation for maximum coverage.

2. Pull-Tab Activation: Simple and quick for users.

3. High-Expansion Foam: Dissolves grime and eliminates odors in minutes.

4. Eco-Friendly Design: Biodegradable and single-use.

How it Works

- Bin Compatibility: 30-96 gallon rolling trash bins.
- Dimensions: 6-inch diameter x 8-inch height.
- Activation: Pull-tab and impact-trigger.
- Foam Volume: 250 mL.
- Weight: 0.6 lbs.

How it Works

- 125 million trash bins in the U.S.
- Growing demand for eco-friendly cleaning solutions.
- Target market: homeowners and eco-conscious consumers.
- Estimated market value: **\$1.5 billion.**

How it Works

- Innovative Design: Patent-pending self-righting and foam activation.
- Convenience: Single-use, no need for manual cleaning.
- Cost-Effective: Affordable pricing for households.
- Sustainability: Eco-friendly and biodegradable materials.

Financial Snapshot

- Funding Secured: \$300,000
- Projected Year 1 Revenue: \$1.2M
- Profit Margin: 68%
- Scalable production and market growth opportunities.

Key Milestones

- Prototype Development: Months 1-3
- Manufacturing Setup: Months 4-6
- Product Launch: Months 6-12
- Retail Partnerships: Months 9-12
