Since Rabbit only employs ALL senior-level staff, every customer gets the same world-class expertise. Experienced staff will result in lower overall product development and production costs, fewer iterations in prototyping, minimal problems in manufacturing, shorter time to market, and, once the product is launched, the greatest profitability!

WHY A FLAT ORGANIZATION STRUCTURE IS BEST?

Rabbit Product Design is a Flat Organization. You are not paying for **layers of management**; there are **no mid-level or junior-level staff** and definitely **no interns!** There are just two co-founders and ALL senior-level staff. Since many are dual-degreed, multi-disciplined, and have a strong manufacturing background, they all wear many hats, resulting in fewer billable hours worked. Therefore, you should spend less money with us, get to market faster, and get a better end product.

HOW WE DIFFER FROM THE COMPETITION

As the only **Trustworthy End-To-End Product Design Firm**, we offer a comprehensive suite of services. We analyze patentability, engineering, manufacturing, and marketing, and sales channels when we design your product. Our overriding goal is your success in the marketplace at sustainable, scalable margins. This comprehensive approach is what sets us apart, and it's what we will deliver for you.

PLEASE READ CAREFULLY BEFORE SIGNING THE CONTRACT:

☒ Checking this box confirms you understand the 4 Phase Process Diagram in this proposal is to show the order of steps from idea to product launch. You understand Rabbit will only perform the services that you pay for in Exhibit A, and I will only receive deliverables for those specific services.

You understand this is a Time and Materials hourly contract. You will be billed for each hour worked and for all materials purchased related to your project or to validate the design. If Rabbit expects to exceed the initial retainer, we will do our best to notify you in advance. Due to the fast nature of product development, this is not guaranteed, and we sometimes will exceed the budget before you are notified. An additional retainer payment may be required in advance before work continues.

You understand product development activities come with some level of risk. We are here to help you to mitigate some of those risks, but no one can mitigate all the risks. Nothing in product development is guaranteed. By developing a product, you are also accepting to take on some level of risk with unknowns.
