Hey John,

I would be happy to set up a call and discuss further. I work from home and can be free just about any time. I am in the Atlanta area so EST, so if you want to shoot me an invite for any day/time except Friday I can be there. I look for to our discussion and have a great week.

Very respectfully,

Jacob Bevier

Hi Jacob,

I am responding to Weston's introduction email. Apologies for the delay.
I would be glad to discuss your aerosol project.
In the interim, attached are two documents FYI...

- A summary of ATS Aerosol Technical Consulting Services, and,
- A brief description of our latest Aerosol Technology Training Programs.

Best way to reach me directly is 603-867-2159.

Regards,
John Chadwick

Jacob,

I am composing this email as a form of introduction. John Chadwick (cc'd here) of Aerosol Technical Solutions spoke with Jamie yesterday and mentioned the aerosol product you are developing. John is experienced in early-phase formulation and development work and is better positioned to support you on that front

Our lab can definitely help with the testing phase once you're further along in development, and I'm happy to stay in the loop. If it would be helpful, I can also join a call with you both at any point to discuss how our roles might complement each other as the project progresses.

Looking forward to hearing how things move forward and if you need anything from our team, let me know.

Weston Schaper
